

Accessibility Statement for Educational Visits

At the Clifton Suspension Bridge Trust Visitor Centre, we are committed to providing inclusive and accessible educational experiences for all participants. Everyone should have equal opportunities to engage and benefit from our workshops, regardless of their abilities. Here is our accessibility statement outlining the measures we take to ensure an inclusive experience.

Physical Accessibility

- Our tours use a fully accessible route, and our workshops take place in our visitor centre that is fully accessible. Please see our visitor centre accessibility statement for further information.
- We strive to ensure the workshop space is free of physical barriers and obstacles that may hinder mobility or access.

Communication Accessibility

- We can provide the bridge's history in Widgit and a large font form.
- Our facilitators use inclusive and plain language during tours and workshops to ensure understanding by all participants.

Visual and Audio Accessibility

- We use visual aids, such as image folders, to support the delivery of the tour.
- Our facilitators are White Badge-affiliated tour guides, so they are trained in making their voices clear and easy to understand.

Inclusive Activities and Engagement

- We design our workshops to be inclusive and adaptable to different abilities and learning styles.
- Our facilitators can provide alternative options or modifications for activities to ensure all participants can actively engage and participate.

We encourage teachers to communicate their specific accessibility needs for their class in advance so that we can make necessary adaptations. We are continuously striving to improve our accessibility practices and welcome feedback from participants on how we can enhance our workshops to meet their diverse needs. Please get in touch with us if you have any questions, concerns, or suggestions regarding accessibility.
